

## MIG and Braze Welding Wire

Welding Alloys : Deoxidized Cu,  
Brass, Phos-Bronze, Si-Bronze,  
Al-Bronze

All over the world, our customers are facing increasing expectations from their customers. Demands for better functionality, higher performance, greater sustainability and improved value for money are the norm. We help our customers meet these expectations, looking beyond metals, to address their primary business goals.

**The characteristics of our welding wires include:**

- Elemental and uniform chemical composition throughout their length
- Consistent yield strength, cast and helix to guarantee proper feeding
- Freedom from scale, excess lubricant and surface defects
- Gauge consistency
- Quality weld deposits

**In addition to welding wires in a wide range of alloys and sizes, we offer our customers:**

- Direct manufacturing source
- Improved quality
- Cost savings
- Just-In-Time sourcing
- Flexible packaging
- Excellent customer service
- Process and product engineering support
